Black Poles

Green Poles

* All sizes are in millimetres unless mentioned otherwise

** All prices includes GST

Wedding Poles

Womadelaide Flag Poles

Flexible Split Bamboo

Bamboo Slats

IMPORTANT INFORMATION /

Please read carefully

Diameter

We measure the nominal base widths.

Do not expect every pole to be an identical width.

Bamboo is a natural product and tapers from base to tip.

Tapering

It is less pronounced on shorter and thicker sizes.

A 2m long pole will have less tapering than a 5.8m long.

Natural poles are grey/green air dried poles.

Green poles are freshly cut.

Natural Dried poles are a light brown color, scrubbed & dried.

When ordering, please take the above information into consideration.

PRESERVATION /

Our policy is to avoid the use of toxic chemicals on the farm. The poles we supply are mostly untreated and non-toxic. They are suitable for most sensitive environmental applications; unfortunately this may result in seasonal insect or fungal attack unless treated. To protect your purchase we suggest that you treat the poles in a manner suitable for the intended use.

We highly recommend applying a coat of clear epoxy coating to help extend pole life and minimize fungal or insect attack.

CAUTION:

AS A NATURAL PRODUCT, BAMBOO POLES CAN SPLIT IN A LOW HUMIDITY ENVIRONMENT. TO MINIMISE THE RISK, KNOCK OUT THE INTERNAL NODAL MEMBRANE.

POLES ARE NOT GUARANTEED AGAINST SPLITTING

CUSTOM ORDER /

Poles can be:

- > cut lengthwise into half splits (cut in half along the length)
- > multiple splits can be cut to a specific length as slats-palings
- > cut to specific widths and lengths.

This means minimum wastage and usually the freight will be less!

We can supply either individual or bulk from Australia's largest selection of bamboo poles, bulk order discounts available on request.

Cost of delivery will depend on destination.
