**EXPLANATIONS - PLEASE READ**

The diameters listed are the nominal base widths.  
The diameters column indicates the range of the base sizes,  
Do not expect every pole to be an identical width.  
Bamboo is a natural product and tapers from base to tip.  
The tapering is less pronounced on shorter and thicker sizes.  
A 2 metre long pole will have less tapering than that of a 5.8metre length.

**Natural** poles are grey/green air dried poles.

**Green** poles are freshly cut.

**Natural Dried** They are a light brown color. Scrubbed & dried.

**When ordering, please take the above information into consideration.**

**Natural Dried Poles**

**Black Poles**

**Green Poles**

**Poles Cutting/Splitting**

**PRESERVATION:**

Our policy is to avoid the use of toxic chemicals on the farm. The poles we supply are mostly untreated and non-toxic. They are suitable for most sensitive environmental applications; unfortunately this may result in seasonal insect or fungal attack unless treated. To protect your purchase we suggest that you treat the poles in a manner suitable for the intended use.

We highly recommend applying a coat of clear epoxy coating to help extend pole life and minimize fungal or insect attack.

**CAUTION:** AS A NATURAL PRODUCT, BAMBOO POLES CAN SPLIT IN A LOW HUMIDITY ENVIRONMENT. TO MINIMISE THE RISK, KNOCK OUT THE INTERNAL NODAL MEMBRANE.

**Coloured Poles**

**Bali Flag Poles**

**Tipi Poles**

Poles can be split into various longitudinal widths. Price depends on width and length.

**POLES ARE NOT GUARANTEED AGAINST SPLITTING**

**Explanation – Pole cutting to order.**

- Poles can be cut to length in half splits (cut in half along the length)
- OR** multiple splits (4-12 splits per pole)
- OR** to a specific length
- OR** into slats – palings
- OR** to a combination of all the above

**This means minimum wastage and usually the freight will be less!**

**Wedding Poles**

**Large Poles**

**Slats**
